

To find, train and equip at-risk young men in order that they may become positive influences of our community through a job and caring relationships

BANQUET UPDATE

We are one month out from the Banquet! This event will be a great opportunity for people to learn a little bit more about the work we do, celebrate the victories, and hear directly from those impacted by our efforts. There will also be fun items to bid on during the silent auction and chances to talk with others from the community who also believe in the work being done.

We are excited to see many of you in person and together applaud the hard work of the men who have come through the program.

For those interested in attending there are several levels of involvement, which are outlined on the next page. Please contact our Executive Director, Pres Montoya (970-381-1973 or presmontoya@gmail.com) for greater details on how to help make this event a success.

To those of you who have already partnered with the event, please know that we are so incredibly grateful to you.

These photos are from our very first banquet back in 2013, come see what has changed and what remains the same!

Banquet
